PRICE 1949 LIST

CONDITIONS OF SALE

The prices in this catalogue cancel all previous prices and are subject to change without notice. All orders for stock are subject to prior sale.

GUARANTEE

This is governed by the Pennsylvania Nurserymen's Association Uniform Retail Replacement Agreement which is as follows: "Provided account is paid within thirty days and plants receive reasonable care, we will replace at one-half price of the plants, plus cost of planting, plants planted in the spring that fail to survive the following summer, or if planted in the fall, fail to leaf out the following spring."

Should we not have the same plants in stock, we reserve the right to give credit for an amount equal to one-half the cost of the plants lost, in other plants of your selection.

DELIVERY CHARGE

Certain items in this catalogue include all delivery costs prepaid to your home. These items are Mushroom Manure, Scott's Lawn Seed, Turf Builder, Eisler's Humus, Lawn Mowers, Garden Tractors, Strawberry Plants, etc. Prices on general Nursery Stock does not include delivery, except on large truck load orders to be delivered within fifty miles.

GUARANTEE OF GENUINENESS

All plant materials are warranted by us to be true to name and in a healthy condition. If any stock proves untrue to variety name or to our description under which sold, we will, upon proper evidence, replace the stock at no cost, or refund the full purchase price. We shall in no case be responsible for any sum greater than the original purchase price.

TERMS

To those having established credit, we are pleased to extend our regular thirty days terms. Orders for C.O.D. shipment must be accompanied by at least one-third of the amount of the order.

We sell tractors, Nursery Stock, Power Mowers, and Landscape jobs on a twelve (12) monthly payment plan. If interested, please ask for details.

EVERGREEN SHRUBS and AZALEAS (RHODODENDRONS)

We take great pride in our list of hardy Azaleas and Rhododendrons which we have growing in our Prospect, Butler County-Nurseries. We have the best selection of hardy varieties to be found within hundreds of miles in any direction. A great many have been imported directly from Holland and have been acclimated to our winters. These are truly aristocrats. We do not attempt to grow varieties that are not perfectly hardy with us.

JOHN M. EISLER

Our nurseries located 7 miles west of Butler, just off Route 422, are one of the largest in the state and we cordially invite you to visit them. You can see how we start the tiny little cuttings in our own propagation house and then grow them into mature plants to supply our customers.

We grow over 500 varieties of trees and shrubs all of which must be perfectly hardy to endure our Western Pennsylvania winters. You may come to the nurseries any day except Sunday and select the material that you like and have it dug fresh for you, or if you can't come any other day in the week, you are invited to stroll through them on Sunday for we always welcome visitors.

The quality of the stock furnished by us is far superior to that sold by so many brokers, who call themselves Nurseries,

Nursery Grown Winter Hardy Plants

the

ER NURSERIES

and who rely upon supplying cheap southern grown stock. The costs of growing plants in this climate with our short summer is far more than that of the south and in many cases we simply can't compete when price alone is considered, but we take pride in growing and selling quality plants as has been done by our family since 1870.

We maintain a landscape service and will be happy to plant your property for you. We are not landscape architects but recommend their services to you. If you wish detailed plans for large homes and estates, it is money well spent when you secure the services of an ethical landscape architect. If our years of practical experience, is of assistance to you, we are always happy to give our advice free, for we employ some of the best horticulturists in this locality.

LARGE SPECIMEN TREES

These trees are all grown in our own nursery and may be selected and marked by the home owner before moving. The measurement is taken at a point six inches above the ground and is the diameter of the trunk.

Purchasing of these trees gives the home owner a ten to twenty year saving of time. If you are middle aged, you may have nice shade trees at once and not wait until you are old to enjoy the trees.

Prices quoted include the furnishing and planting of the tree complete with a large ball of earth as well as a replacement guarantee. Prices are subject to deviation dependent upon conditions and distance from Nursery. On orders for several trees to the same delivery point, we can often give a discount. If holes are dug by owner and subsoil removed it will also cut costs.

EISLER'S HUMUS

This is a fine grade of Peat Humus produced in Mercer County. It is a splended soil conditioner and acts as a sponge in retaining moisture in the soil. Use it as a top dressing or mix it with your soil in preparing a seed bed. It is a splendid mulch for Rhododendrons, Ilex, Azaleas, and Laurel. It lacks the fertilizing qualities of Mushroom Manure but is higher in organic content.

SPENT MUSHROOM MANURE

Spent Mushroom Manure is real stable manure to which has been added 20% of rich top soil and then used to grow one crop of Mushrooms in the huge limestone caverns at West Winfield in Butler County. The heat of fresh manure is gone, but the organic content and fertility of good barnyard manure is retained.

The high organic content, almost five times that of top-soil, is quite valuable in loosening heavy soils and increasing the moisture retention value. It is a long time source of mineral elements which are released gradually through decomposition into the soil.

New studies prove that organic plant foods such as Mushroom Manure are absolutely vital in growing crops for human consumption. They claim that vegetables grown without organic elements are almost valueless in supplying the needs of our body.

A two-inch layer of Spent Mushroom Manure mixed with clay excavation soil will produce a good lasting turf. This makes a much lower cost lawn than the hauling in of some low grade so-called top soil. This has been proven over and over again. It will produce a good lasting turf almost weedless.

For use on a vegetable, or flower garden we recommend from two to four inches spaded into the soil. A generous application will supply your garden with ample plant food for a long time. It loosens the soil, retains moisture and promotes growth. For mulching, or placing around any established plants, we recommend from one to two inches. For roses, it should be placed down in the bed on planting and then use some to mulch them every fall for winter protection. As a top-dressing for lawn either in the fall or winter, we recommend from ¼ to ½ inch. It is also used by many gardeners to cover newly seeded lawns to keep them from drying out after seeding.

Spent Mushroom Manure lacks the filth, odor and disease spread in ordinary stable manure for it is sterilized before entering the Mushroom growing plant. This process also kills nearly all weed seeds found in ordinary barnyard manures.

The amount required to cover a given area is as follows:

1 cubic yard will cover as follows:

79 square feet to a thickness of	4 inches
108 square feet to a thickness of	3 inches
162 square feet to a thickness of	2 inches
324 square feet to a thickness of	1 inch
648 square feet to a thickness of	$\frac{1}{2}$ inch
1296 square feet to a thickness of	$\frac{1}{4}$ inch

FERTILIZERS**GROWELL**

Lawn and Garden Fertilizer

Growell has been developed by the Western Pennsylvania Nurserymen's Association as an all-purpose Fertilizer for use on your lawns, trees, shrubs, flowers, or vegetable garden, and is sold only by them.

Best results are obtained by feeding with 3 pounds per 100 square feet of lawn or garden area, making application early in the spring and then about six weeks later. A healthy, well-fed lawn is the best weed eradicator that has been found, so if you are short of labor, most of the troublesome weeds can be eliminated by proper feeding.

HAMMONDS IMPROVED SLUG-SHOT

A light, composite, fine powder that is easily distributed either by duster or in water and sprayed. It is thoroughly reliable in killing the Mexican bean beetle and other leaf-chewing insects.

1 lb.	\$.40	5 lbs.	\$1.65	25 lbs.	\$5.00
------------	--------	-------------	--------	--------------	--------

CRABEX

Crab Grass Killer

Ogen's Crabex kills Crab Grass without destroying permanent lawn grasses. Its toxic action is selective—although temporary discoloration of the turf may occur, the lawn will regain its natural color after several days—and the Crab Grass will be dead. Crabex should not be used on lawns seeded with Creeping Bent. Crabex should not be used on newly seeded lawns with less than 90 days growth.

Crabex is likewise valuable in controlling other lawn weeds, such as Dandelion, Plantain, Buckhorn, Chickweed, Spurge, Heal All, Ground Ivy, Knotweed, and Sorrell.

Crabex is easy to use—simply mix with water as directed and apply to infested area with a good compressed air sprayer—or one that throws a fine mist.

------------	--------	-------------	--------	-------------	--------

MEXOGEN

Kills and Repels Mexican Bean Beetles. Mexogen is a highly concentrated Rotenone contact spray and repellent. Mexogen destroys the larvae and eggs, as well as the adult bean beetle, and is an efficient repellent. It cleans and tones the foliage. It is easy and pleasant to use. Requires no spreader. Dilutes 1 to 400.

Half Pint	\$1.00	Quart	\$3.50
-----------------	--------	-------------	--------

FUNGTROGEN

Mildew-Black Spot Spray. Fungtrogen is a highly concentrated liquid fungicide invisible on the foliage or blooms. It is the noted Rosenbluth formula combined with the plant stimulant—Hortogen—that results in plant vigor, superb foliage and amazing blooms.

Fungtrogen is an effective and scientific preventive and remedy for mildew, black spot and many fungus diseases of Roses, Phlox, Hollyhocks, Delphiniums, Sweet Peas, Chrysanthemums and many other flowering plants. It is equally effective in the control of diseases on vegetable plants, especially Tomato Blight.
